Precipitation probability							
30%	40%	40%	40%	40%	30%	30%	30%

Forecast for Monday 01 Nov 2021

Weather: A few showery outbreaks of rain overnight and staying cloudy possibly a few clear spells further east. Showery outbreaks of rain will continue for much of the day, showers will be heavy at times and may group together however they should move through quite quickly in strong winds. Showers becoming less frequent in the afternoon and a few brighter spells are possible later.

Chance of cloud free mountain/hill tops above 600m: 40%, low cloud in association with showery outbreaks, more cloud breaks likely for south and eastern areas. Improving to 70% in the afternoon when a lot of low cloud will disperse.

Visibility: Out with showers, visibility below the cloud will be good however it will be quite poor at times in showers. Cloud bases will be up and down but scattered or broken cloud above 500m is likely for the morning, lower and thicker cloud is expected in the west. Cloud tending to thin and lift in the afternoon with just patches around 600m.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Southwesterly winds will veer westerly later in the day which will help low cloud to clear, however it will also be a colder airstream so wind chill will increase in the afternoon. Gales force gusts are possible on the higher tops in the middle of the day.

Recent rainfall: measured at Malham: altitude 375m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
15:00 on Sun 31 Oct 2021	9.2mm	20.8mm	43mm

Forecast for Tuesday 02 Nov 2021

Weather: A few showers overnight will continue during the day but a lot of bright and sunny weather too, a few heavier showers expected.

Maximum wind: Westerly or northwesterly 10-15mph.

Chance of cloud free mountain/hill tops above 600m: 80%, scattered low cloud around the tops in showers.

Visibility: General visibility will be good or very good but it will be poor at times in heavier showers.

Temperature: **Valleys:** Plus 9 Celsius.
At 600m: Plus 1 rising to 5 Celsius.
Freezing level: Above the summits.
